The month in brief

California dominated AI legislative activity in September 2026, accounting for all 21 enactments and all 3 vetoes. The enacted measures included CA SB 813, which establishes the California Artificial Intelligence Standards and Safety Commission to develop safety standards and oversee independent verification organizations, and CA SB 947, which prohibits employers from using automated decision systems to infer protected status or solely make termination decisions. The governor vetoed CA AB 2575, which would have required health facilities to provide clinical decision support system inventories to healthcare workers, and CA SB 903, which would have regulated AI use by mental health professionals. Seven laws take effect before year-end, including Connecticut's HB 5222 on consumer protection and data privacy and Maryland's SB 8 on identity fraud involving deepfakes, both effective October 1, and Pennsylvania's SB 806 on unfair competition effective December 21.
