The month in brief

California dominated September 2026, accounting for 12 of the month's 20 stage changes, with 11 bills enacted and one vetoed. The governor signed laws restricting workplace surveillance (AB 1331, AB 1883), requiring privacy-protective default settings on operating systems and applications (AB 2561), and overhauling insurance data practices under SB 354. Student privacy protections expanded under AB 1159, which prohibits using student data to train generative AI systems. Delaware enacted two amendments to its data privacy and breach notification laws (HB 380, HB 381). Seven laws take effect between October and November 2026, including Maryland's Data Privacy and Protection Act of 2026 on October 1.
