The month in brief

California dominated September activity, accounting for 54 of the 87 bills that changed stage. Governor Newsom signed 40 bills into law and vetoed 14. Among the new California laws are CA SB 503, which requires developers of artificial intelligence systems used in clinical decision-making to identify and mitigate bias and submit systems for independent audits beginning January 1, 2030, and CA AB 1979, which deems businesses offering health care chatbots to consumers as health

care providers subject to medical information confidentiality requirements. Delaware enacted seven laws, including DE SB 120, requiring health plans to cover biomarker testing when supported by FDA approvals or clinical practice guidelines for policies issued after December 31, 2027. Federal activity included three bills passing one chamber and a rule on agent and broker registration for the exchanges taking effect September 22.

Taking effect

Laws and rules matched to this Tracker with an effective date between 1 September 2026 and 29 December 2026. Of the 718 laws signed in 2026, 408 name no effective date that could be read and are not listed. Several dates: parts of the law start on other dates.
