The month in brief

September 2026 was a quiet month for transportation and logistics legislation, with just nine bills changing stage. California dominated the activity, enacting five bills and vetoing two. The most significant new laws include CA SB 1246, which imposes new requirements on autonomous vehicle operators including that remote drivers be located in the United States, and CA SB 667, which mandates wayside detector systems on freight rail tracks. A federal bill, S. 3135, advanced out of committee; it would allow diesel vehicle manufacturers to suspend certain emissions control functions in cold weather.
